

RIPPER

FEATURES & BENEFITS

- An inexpensive tool for removing of rocks, tree stumps, roots etc. from the ground
- Eliminates a huge amount of manual work

The ripper is an inexpensive and practically irreplaceable tool in ground works. With the ripper it is easy and effortless to remove roots as well as rocks even from hard packed ground. The ripper teeth are 30 cm (12 in) long for deep surface penetration and guarantee a long lifespan for the attachment.

The ripper is operated by pressing the three teeth into the ground next to the object you wish to remove. When the teeth have sunk into the ground, tilt the ripper inwards and then lift the boom upwards which will bring the object on top of the ground.

Model	Working depth	Width	Weight	Code
Ripper	30 cm (11.8 in)	50 cm (19.7 in)	23 kg (51 lbs)	C891220
